Metropolitan Ceramics®
Unglazed Ceramic Quarry Tile

Metropolitan has long been specified for use in many areas of religious buildings. Spaces as diverse as baptismal fonts, vestibules, and entire sanctuaries have taken advantage of the features and benefits of Metropolitan quarry tile.

Entryways and foyers- kitchen spaces- outdoor hardscapes- stairs and stairwells- rest rooms and more, all benefit from a product with this kind of durability and long life cycle.

Because religious construction is meant to last many generations, durable products must be included in the design. No where is this more evident than in the choice of floor coverings.

Religious buildings must also accommodate continuous foot traffic. Because of these two elements- longevity and traffic, these buildings need a floor covering that will hold up to years of wear and offer peace of mind from slip fall worries.

There is one product that fits these two specific needs and has a natural appealing look that adds warmth to any space- Metropolitan Ceramics unglazed quarry tile.

Photos above show Metropolitan Ceramics Tile used in an entryway and baptismal font. The image to the right shows an entire sanctuary tiled.

FEATURES & Benefits

- Use Indoors and Out in any Climate.
- Slip Resisting Surface.
- Extreme Durability for Heavy Traffic.
- Will not Bubble-Chip-Melt.
- Resists Grease-Bacteria-Dirty Water.
- Unglazed Surface Won’t Show Wear.
- Can be Used Vertically.
- Resists Chipping and Abrasion.
- Economical.

GREEN at a Glance

- Abundant natural resource.
- Little waste in production.
- No volatile organic compounds.
- Offering decades of performance.
- Safe to discard or repurpose.
Sizes, Colors, Textures

Sizes options include 4” x 8”, 4” x 12”, 6” x 9”, 8” x 8” and 6” x 6”. Many size options are nominal (for example, the 4” x 8” is actually 3 5/8” x 7 5/8”) to allow for a grout joint when designing patterns. The most popular size is 6” x 6” (actual size). Tile thickness is 1/2”. For specific applications, some products are available by special order in 3/8” and 3/4” thickness. Different size options are available in each product line. See the Metropolitan Ceramics website for complete details.

The grout joint recommended in most instances is 3/8”. A 1/4” joint may sometimes be used in some instances, see web site for details. Metropolitan quarry tile is available in a variety of natural earth tones. Some products are reduction fired in the kilns to produce a random shade variation. Many colors are manufactured with little to no shade variation- for a ‘single tone’ appearance.

A number of products are available with texture for added appeal and to increase slip resisting properties. Details on all products manufactured by Metropolitan Ceramics are available on the Metropolitan Ceramics’ website - metroceramics.com.

Trim Pieces

Metropolitan Ceramics offers a number of trim pieces. Shown below are some of the most popular trim options. Please see the Metropolitan web site - metroceramics.com for a complete listing of trim and availability.

Added Slip Resistance

**QUARRYBASICS® XA Abrasive**

- Silicon Carbide Embedded Surface
- Through-the-Body Metallic Additive

**METRO TREAD®**

Raised Tread Design - installed in a checkerboard pattern.

Metro Tread has the added benefit of ease of cleaning. Will not trap debris. Meets the strictest health department regulations - California - without the need for additional drains.

Environmental

For more information on Metropolitan Ceramics and LEED V4, please visit our web site - metroceramics.com.

Specifications

By ANSI Standard Specification A137.1 Metropolitan Ceramics’ unglazed quarry tile is classified as quarry tile, however, the exceptional technical characteristics noted allow them to be used in virtually any application suitable for ceramic tile. Metropolitan Ceramics’ unglazed tile meets both the ASTM standards, the ANSI A137.1 specification for quarry tile, and Metropolitan internal standards as listed.

Cleaning and Maintenance

Metropolitan quarry tile is easy to maintain and requires only neutral cleaners and no special power washing!

For complete specification and cleaning/maintenance information, including download versions, please visit our web site - metroceramics.com.
